

# Getting Started With Spring REST Docs

This is an example output for a service running at <http://localhost:8080>:

*request*

```
GET / HTTP/1.1  
Host: localhost:8080
```

*response*

```
HTTP/1.1 200 OK  
Content-Type: application/json  
Content-Length: 25  
  
{"message": "Hello World"}
```

As you can see the format is very simple, and in fact you always get the same message.
